

2021

City of Toledo, Ohio

Annual Combined Sewer Overflow (CSO) Report

April 14th, 2022

I. Description

Table 1 is a description and address of each CSO outfall location, including the OEPA identification number. The table lists the treatment before discharge, if any, status of public signage, and yearly summary of the outfall activity.

Table 2 is a description of the public access areas potentially impacted by CSO activity. These sites are posted with signage.

Annual Precipitation data

II. A City wide map showing the site of the rain gauge locations and the total amount of rainfall, in inches, during the reporting year.

III. **Toledo Waterways Initiative (TWI)** - Status of Implementation of CSO Nine
Minimum Controls and Long Term Control Plan

The T.W.I. construction program is 100% complete, and all 166 Consent Decree Milestones have been met. The City has submitted a work plan to the USEPA for the 12-month Post Construction Monitoring period as required by Chapter 15 of the LTCP. The plan has been approved, and the Post Construction Monitoring period began on April 1st 2022.
