

2022

City of Toledo, Ohio

Annual Combined Sewer Overflow (CSO) Report

April 13th, 2023

## I. Description

Table 1 is a description and address of each CSO outfall location, including the OEPA identification number. The table lists the treatment before discharge, if any, status of public signage, and yearly summary of the outfall activity.

Table 2 is a description of the public access areas potentially impacted by CSO activity. These sites are posted with signage.

 OK 4-13-23 RR  
 OK 4-6-23 RR  
 OK 4-13-23 RR  
 OK 4-13-23 RR

## Annual Precipitation data

- II. A City wide map showing the site of the rain gauge locations and the total amount of rainfall, in inches, during the reporting year.

III. **Toledo Waterways Initiative (TWI)** - Status of Implementation of CSO  
Nine Minimum Controls and Long Term Control Plan

The post construction monitoring period, as required by the long term control plan, continued until March 31, 2023. The information is currently being compiled and analyzed, and a report on the system performance will be generated to be submitted to the USEPA.
